Type of Program Proposal:

Concentration

Program Change Type:

Substantive

Title of the Program:

BA in Philosophy (Science, Reason and Values)

Designation: (degree terminology)

Bachelor of Arts

Briefly describe the program proposal (new or change) and provide a justification:

All Philosophy concentrations are being revised for the following reasons: (1) To achieve greater uniformity across the concentrations in core subject and total unit requirements; (2) to bring the major into unambiguous conformity with EO 1071; (3) to respond to a recent program review suggestion to create a required entry level Philosophical Methods (PHIL 89) course that will both prepare majors for advanced study and serve as an entry level assessment vehicle in conjunction with our Senior Seminar (PHIL 189). (4) To better prepare majors for advanced study by creating uniform prerequisites to upper division core courses. The 2 unit increase in the General Concentration results from the addition of PHIL 89. This will not require additional resources. Indeed we ultimately expect the preparatory value of this course to facilitate more timely graduation. This particular concentration is also undergoing a name change and the content of the concentration is being modified to bring it more into alignment with the Department's identity as Sacramento State's center of research and instruction in ethics and values. (Note: Please examine Schematic Overview of Program Changes which has been attached as an additional unrequested document.)

Catalog Description:

Total units required for BA: 120

Program Description

The concentration in Science, Reason and Values is designed for students who are interested in the philosophical, rational and moral foundations of science and its applications. This concentration provides an excellent double major opportunity for science students interested in broadening and deepening their understanding of the normative elements of their chosen field. It is also a good choice for philosophy students who are interested in graduate study in the philosophy of science.

The concentration focuses on providing students with a deep understanding of the nature of scientific rationality. Topics include scientific explanation, the nature of scientific evidence, the process of confirming and revising our theories and beliefs, the problem of decision under conditions of uncertainty, and the scientific study of social phenomena. The philosophy of science also explores traditional philosophical questions as they arise in the context of scientific inquiry. Some of these are: Do we really know that the theoretical entities of science exist? What is the difference between science and pseudo-science? Do different sciences give us fundamentally different ways of understanding the world? Is science converging on truth or will it always undergo revolutionary changes that reject widely accepted theories of the past? Does scientific inquiry have intrinsic value or are there questions that scientists should not ask?

Note: Philosophy majors must fulfill the GE Writing Intensive "supervenient requirement" with courses **in the major, only**.

As defined by policy <http://www.csus.edu/umannual/acadaff/fsm00010.htm>, a change in units constitutes a substantive change to the program. If your changes constitute a substantive change, please refer back to the "Program Change Type" field above to ensure that "Substantive" is selected.
