**Justification for course proposal:**

The DPT program has proposed to move PT618 to the 1st year Summer Semester and PT646 to the 2nd year Fall Semester. Consequently, corequisite courses listed in the catalog would no longer be accurate. The program follows a sequential curricular model, and DPT students may only take courses in the sequence listed in the catalog. Moreover, the department approves and enrolls DPT students in their classes each semester. As such, the program has opted to eliminate listed corequisite and prerequisite courses, as students would not be allowed to enroll in any program course without departmental approval.

**Course Description: (Not to exceed 90 words and language should conform to catalog copy.)**

This course focuses on developing an understanding of components of human movement under normal and pathological conditions. Content includes the American Physical Therapy Association Model of Practice, models of disablement, contemporary concepts of motor learning and motor control, task analysis, and theories of the recovery of function. The course includes a review of the foundations of neuroanatomy for normal movement.
