Action

Information

1. Organize the data.

	*Empl ID	Empl Rcd	Eff Seq	Name	Empl Stat
--	----------	----------	---------	------	-----------

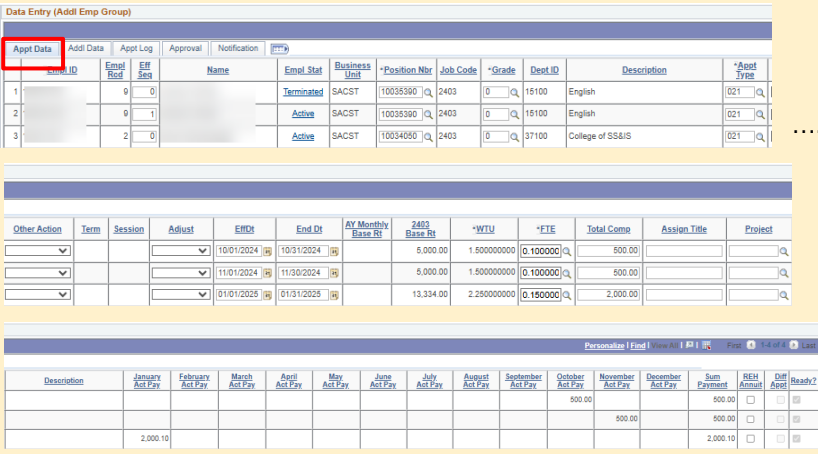

Column headers are sortable

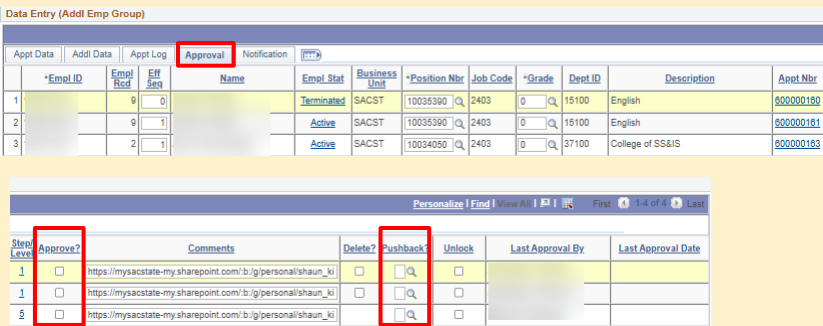

Action 1 Notes:

You can organize the appointments in your approval queue by sorting any of the column headers. Like in Excel you can sort multiple headers to get the data organized in the way that you want it by organizing it in reverse. For example, if you want the data organized by Dept ID > Name > Appt Type you would first sort by Appt Type followed by Name and finally by Dept ID.

The link should be set so that anyone with the link can access the document. When copying the link be sure to copy the entire link. Open the link in a separate tab or window. If the link is missing, incomplete, or broken pushback the appointment to the originator (Level 0) and request an updated link.</p>
