

Sac State Equity & Affinity Centers

These centers are safe spaces for students from historically marginalized backgrounds and identities. They promote self-empowerment through resources, programming, and one-on-one support. The centers also help students learn about themselves and others, build community, and strengthen their connection to Sac State.

Note: Click on the center's name to visit their website for more information. The color next to the center name corresponds to the colored building located on the campus map.
