

# First-Gen K - 16 Network Consortium

The goal is to connect regional K-16 educational personnel with a similar and steadfast commitment to supporting and ensuring the success of first generation students through educational programming and community collaborations. To guide our collective work, two-core focus of the consortium are as follow:

- Commit to advance the First-Gen K - 16 consortium to provide access to information, guidance, mentorship, and academic, social, and career support.
- Participate in the ongoing conversation for opportunities to generate knowledge and share best practices to advance K-16 first-gen student success.

If your organization, college or university is interested to join this consortium, please contact:
